

SCIENTIFIC RESEARCH METHODOLOGIES AND TECHNIQUES

Unit 14.a: PROJECT PROPOSAL PREPARATION - EXAMPLES = ICT example =

RUI NEVES-SILVA
rns@fct.unl.pt

Rui Neves-Silva – Short CV

- Engineering degree in Electrical and Computers Engineering (Telecommunications) in 1991 (IST/UTL);
- Master in ECE (Control and Robotics) in 1994 (IST/UTL);
- PhD in ECE in 2000 (IST/UTL) within the research theme of *Predictive Adaptive Control in Power Plants*;
- Advance Program in Management for Executives (PAGE) in 2012 (Católica-Lisbon).
- Certified Personal Coach.
- Founder of **inknow solutions** working in knowledge integration.
- **Researcher at INESC-ID Lisboa (1991 - 97).**
- Associate Professor at DEE–FCT/UNL Decision and Control Systems Section;
- **Senior Researcher at CTS / UNINOVA**
- **Project coordinator of 6 European projects in FP6, FP7 and H2020 in the ICT area.**
- **Evaluator in several Grant Programmes.**
- More than 100 communications in conferences and scientific journals related to the area of decision and control.

<http://docentes.fct.unl.pt/rns>

Unit 1: INTRODUCTION

Objectives for a PhD, base concepts, types of research, relationship with supervisor

Unit 2: SCIENTIFIC METHOD

Overview of research methods, steps of the scientific method, engineering research

Unit 3: LITERATURE REVISION

Information sources, information search, special sources, synthesis and critics

Unit 4: PUBLICATION OF RESULTS

Writing scientific papers, publication channels, evaluation procedures, citations

Unit 5: THESIS ORGANIZATION AND VALIDATION

Structure, research question, thesis contribution, validation of results

Unit 6: RESEARCH IN COLLABORATION

Types of projects and partnerships, requirements, collaboration spirit and constraints

Unit 7: PROJECT PROPOSAL PREPARATION

General structure of a proposal, typical example

Unit 8: RESEARCH PROJECT MANAGEMENT

Management structure, management principles, tools, risks, reporting

Unit 9: ASSESSMENT OF RESEARCH RESULTS

Phases of research and outcomes, research performance indicators

Unit 10: RESEARCH ETHICS

Ethical issues and behavior, responsible conduct, scientific practices and violation

Unit 11: INTELLECTUAL PROPERTY RIGHTS

Concepts, types, protection mechanisms, rights identification, rights transfer

Unit 12: ROADMAPPING AND FUTURE PLANNING (1)

Future planning objectives and approaches, concept of roadmapping

Unit 13: ROADMAPPING AND FUTURE PLANNING (2)

Roadmapping methodology

Unit 14: PROJECT PROPOSAL PREPARATION - EXAMPLES

Examples in different programs – EC-Horizon Europe-ICT, ESA, NMP

Unit 15: PANEL

Contents of Unit 14.a

- This Unit presents a project proposal preparation **example to a call in the Information and Communication Technologies (ICT)** of the current Framework Programme of the European Commission: **Horizon Europe**.
- At the end of this Unit, the audience should be able to identify the **key aspects on building a proposal to ICT-HE**, including, the steps to follow from the first idea to the proposal submission.

#HorizonEU

HORIZON EUROPE

THE EU
RESEARCH &
INNOVATION
PROGRAMME 2021 – 27

Research and
Innovation

This presentation is based on the political agreement of 11 December 2020 on the Horizon Europe. Information on some parts is pending revision.

19 March 2021

3 Pillars

HORIZON EUROPE

SPECIFIC PROGRAMME: EUROPEAN DEFENCE FUND

*Exclusive focus on
defence research
& development*

Research
actions

Development
actions

SPECIFIC PROGRAMME IMPLEMENTING HORIZON EUROPE & EIT*

Exclusive focus on civil applications

Pillar I EXCELLENT SCIENCE

European Research Council

Marie Skłodowska-Curie

Research Infrastructures

Pillar II GLOBAL CHALLENGES & EUROPEAN INDUSTRIAL COMPETITIVENESS

Clusters

- Health
- Culture, Creativity & Inclusive Society
- Civil Security for Society
- Digital, Industry & Space
- Climate, Energy & Mobility
- Food, Bioeconomy, Natural Resources, Agriculture & Environment

Joint Research Centre

Pillar III INNOVATIVE EUROPE

European Innovation
Council

European Innovation
Ecosystems

European Institute of
Innovation & Technology*

WIDENING PARTICIPATION AND STRENGTHENING THE EUROPEAN RESEARCH AREA

Widening participation & spreading excellence

Reforming & Enhancing the European R&I system

Key Impact Pathways

1. Creating high-quality new knowledge
2. Strengthening human capital in R&I
3. Fostering diffusion of knowledge and Open Science

**Scientific
Impact**

4. Addressing EU policy priorities & global challenges through R&I
5. Delivering benefits & impact via R&I missions
6. Strengthening the uptake of R&I in society

**Societal
Impact**

7. Generating innovation-based growth
8. Creating more and better jobs
9. Leveraging investments in R&I

**Economic
Impact**

Pillar II - Clusters

GLOBAL CHALLENGES & EUROPEAN INDUSTRIAL COMPETITIVENESS:

boosting **key technologies** and solutions underpinning **EU policies & Sustainable Development Goals** (6 clusters and JRC – non-nuclear direct actions)

Health

Culture,
Creativity &
Inclusive
Societies

Civil
Security for
Society

Digital,
Industry &
Space

Climate,
Energy &
Mobility

Food,
Bioeconomy,
Natural
Resources,
Agriculture &
Environment

€53.5 billion

~60% of the budget

Areas of intervention

- manufacturing technologies
- key digital technologies including quantum technologies
- emerging enabling technologies
- advanced materials
- artificial intelligence and robotics
- next generation internet
- advanced computing and Big Data
- circular industries
- low carbon and clean industries
- space including earth observation

Horizon Europe (HORIZON)

Public Access

Horizon Europe

Horizon Europe is the ambitious EU research & innovation framework programme for 2021-2027 with a budget of €95.5 billion.

Its overarching goals are:

- to strengthen the EU's scientific and technological bases and the European Research Area (ERA);
- to boost Europe's innovation capacity, competitiveness and jobs;
- to deliver on citizen's priorities and sustain our socio-economic model and values.

with a particular focus on creating impact or the European Green Deal, the digital and sustainability transition and recovery from the coronavirus-crisis.

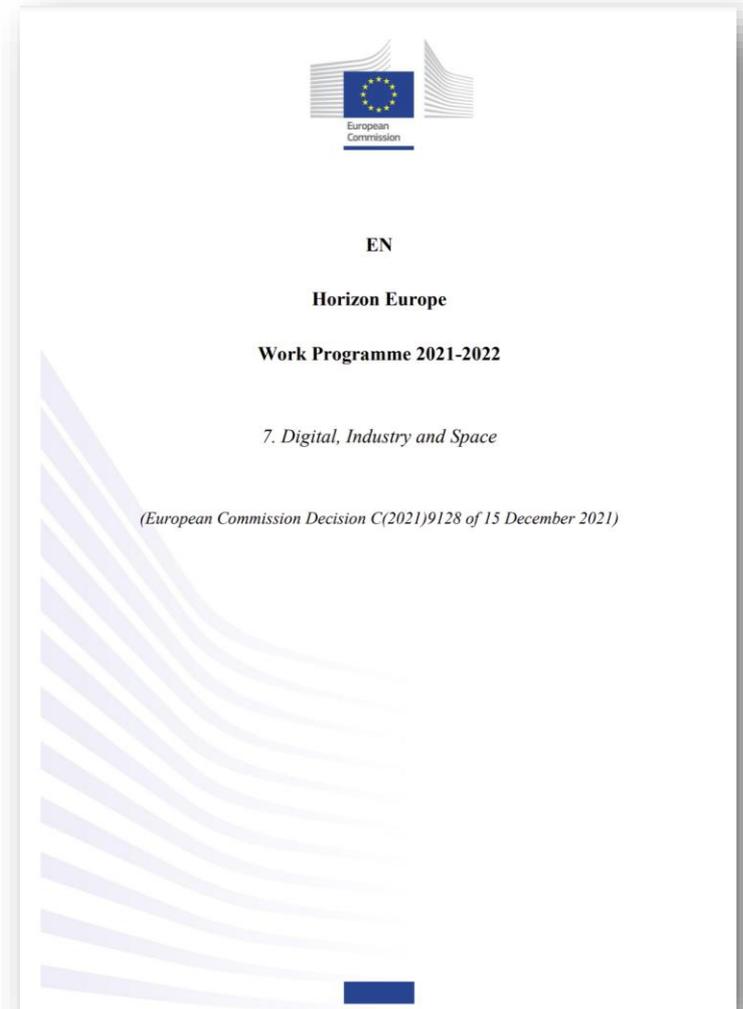

For more information, please see the [Horizon Europe web site](#).

- [Find calls for proposals](#)
- [Projects & Results](#)
- [Programme structure](#)
- [Missions areas](#)
- [What's new?](#)

Find calls for proposals in Horizon Europe

Projects & Results

- The **Horizon Europe Cluster 7 Work Programme** defines, for a specific period, the priorities for the calls for proposals to be launched.
- They **reflect the input received** from the Programme Committee and Advisory Group, the European Technology Platforms and a series of detailed consultations with the main stakeholders.

- **Minimum conditions**
 - Unless otherwise provided for in the specific call conditions, (...) the consortium includes:
 - at least one independent legal entity form a MS;
 - at least two other independent legal entities from different MS/AC
- **Additional conditions**
 - To be set out in the Work Programme (i.e. number of participants, type of participants, etc.)

NOVA Types of actions supported by grants

NOVA SCHOOL OF
SCIENCE & TECHNOLOGY

Research and innovation actions (RIA)

Activities that aim primarily to **establish new knowledge or to explore the feasibility of a new or improved technology, product, process, service or solution**. Includes: basic and applied research, technology development and integration, testing, demonstration and validation of a small-scale prototype in a laboratory or simulated environment.

Innovation actions (IA)

Activities that aim directly to **produce plans and arrangements or designs for new, altered or improved products, processes or services**. These activities may include prototyping, testing, demonstrating, piloting, large-scale product validation and market replication

Coordination and support actions (CSA)

Activities that contribute to the objectives of Horizon Europe. This excludes R&I activities, except those carried out under the 'Widening participation and spreading excellence' component of the programme (part of 'Widening participation and strengthening the European Research Area').

...

Contents of the work programme

- Introduction and general objectives;
- Priorities, features and structure;
- **Content of calls**
 - For each call (e.g. *A HUMAN-CENTRED AND ETHICAL DEVELOPMENT OF DIGITAL AND INDUSTRIAL TECHNOLOGIES*):
 - There are a set of Specific Topics, for example:
HORIZON-CL4-2022-HUMAN-02-01: AI for human empowerment
 - Specific Conditions (e.g, type of action [RIA, IA, CSA,...])
 - Expected Outcome
 - Scope
- Conditions for these calls (**what and when!**)

Work programme

Conditions for these calls

Specific conditions 	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 4.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 16.00 million.
<i>Type of Action</i>	Research and Innovation Actions 
<i>Technology Readiness Level</i>	Activities are expected to start at TRL 2-3 and achieve TRL 4-5 by the end of the project – see General Annex B. 
<i>Procedure</i>	<p>The procedure is described in General Annex F. The following exceptions apply:</p> <p>To ensure a balanced portfolio covering a broad range of AI research areas, grants will be awarded to applications not only in order of ranking but at least also to the highest ranked proposal addressing focus 1 (mixed human-AI initiatives) and the highest ranked proposal addressing the focus 2 (hybrid decision-support), provided that the applications attain all thresholds.</p>

Example taken from the work programme:

Activities should focus on
(...) systems that reached
already **TRL 2-3** and
bring them to **TRL 4-5**

9	Successful mission operations
8	System complete and qualified
7	Demonstration in operational environment
6	Demonstration in relevant environment
5	Technology validation in relevant environment
4	Technology validation in lab
3	Experimental proof of concept
2	Technology concept formulated
1	Basic principles observed

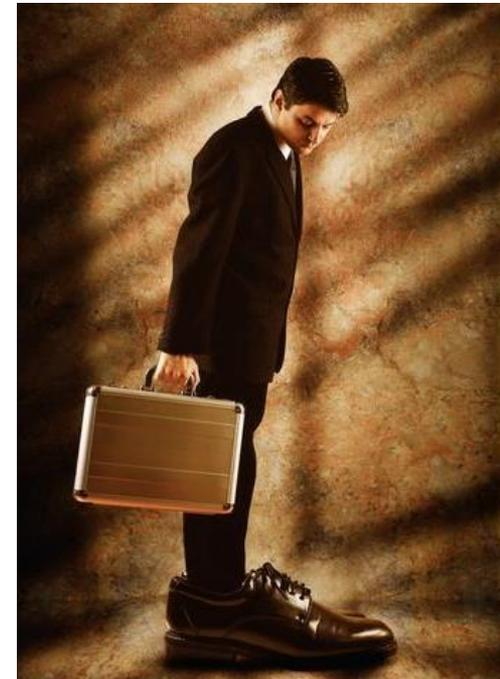

Find your Project Officer: DG CONNECT

- The several topics are under the responsibility of EC Units.
- The Project Officer or just the PO is your contact point with the European Commission.
- They usually attend the Infodays organised by EC to explain the content of the calls.
- They can give you some additional information about the match between your idea and the scope of the call.
- For ICT search:

Success Criteria

- **Project idea** (innovative, excellence of scientific content, etc.)
- **Co-ordinator and partners** (key players, diversity, coverage, etc.)
- **Proposal** (“**SELLING the PROJECT**”):
 - What are you doing?
 - Why are you doing this?
 - Who benefits?
 - Who is doing what?
 - What does it cost?
- **Put yourself on the evaluator shoes...**

EC Evaluation criteria

Excellence	Impact	Quality and efficiency of the implementation
<ul style="list-style-type: none"> • Clarity and pertinence of the project's objectives, and the extent to which the proposed work is ambitious and goes beyond the state of the art. • Soundness of the proposed methodology, including the underlying concepts, models, assumptions, (...) 	<ul style="list-style-type: none"> • Credibility of the pathways to achieve the expected outcomes and impacts specified in the WP, and the likely scale and significance of the contributions from the project. • Suitability and quality of the measures to maximise expected outcomes and impacts, as set out in the dissemination and exploitation plan, including communication activities. 	<ul style="list-style-type: none"> • Quality and effectiveness of the work plan, assessment of risks, and appropriateness of the effort assigned to work packages, and the resources overall. • Capacity and role of each participant, and the extent to which the consortium as a whole brings together the necessary expertise.

Each criterion will be scored out of 5.

The threshold for individual criteria will be 3.

The overall threshold, applying to the sum of the three individual scores, will be 10.

Finding a partner

EC Organised Events

- Usually, during the most active period of a work programme there are meeting events (Proposers' Day) where everyone has the opportunity to present their ideas and discuss them with other potential partners and even advisors from the commission.

CORDIS

- CORDIS has a number of services and information sources which may be useful in partner search for participation in ICT projects, as well as a list of organisations which have already expressed an interest in participating in the calls (call for Expression of Interest).

National Contact Points

- There is a network of National Contact Points (NCPs), which can be helpful to organisations from their country both for general advice (particularly on preparing proposals) and for finding partners from other countries. Organisations should contact the NCP of their own country.

Ideal-ist project web-service

- The Ideal-ist project helps potential proposers and newcomers to find the right partners across international boundaries. It comprises a network of 49 national representatives in each Member and Associated State, as well as Western Balkan Countries, New Independent States and Mediterranean Countries

Experiences – DO NOT (BE)...

- ...too ambitious and complex to be believable;
- ...unclear and chaotic;
- ...irrelevant to the call and Work Programme;
- ...not going beyond the state of the art;
- ...miss to explain how to achieve the objectives;
- ...miss to clarify/quantify the results (=no exploitation);
- ...present unrealistic cost estimates;
- ...present an unbalanced project consortium;
- ...lack to present appropriate management structure and processes.

- **Start** by reading the **work programme** document and try to understand what, **exactly**, EC is expecting from proposals;
- Cross the objectives of the work programme with your scientific interests and ask yourself “*what do I have to offer fulfilling these objectives/needs?*”;
- Prepare a first abstract on your idea and try to **discuss it with EC project officers** from the unit your project will fit. They won't tell you where to go but they will tell you if you are misdirected.

macro structure of the proposal

Part A

general information
+
administrative data

Part B

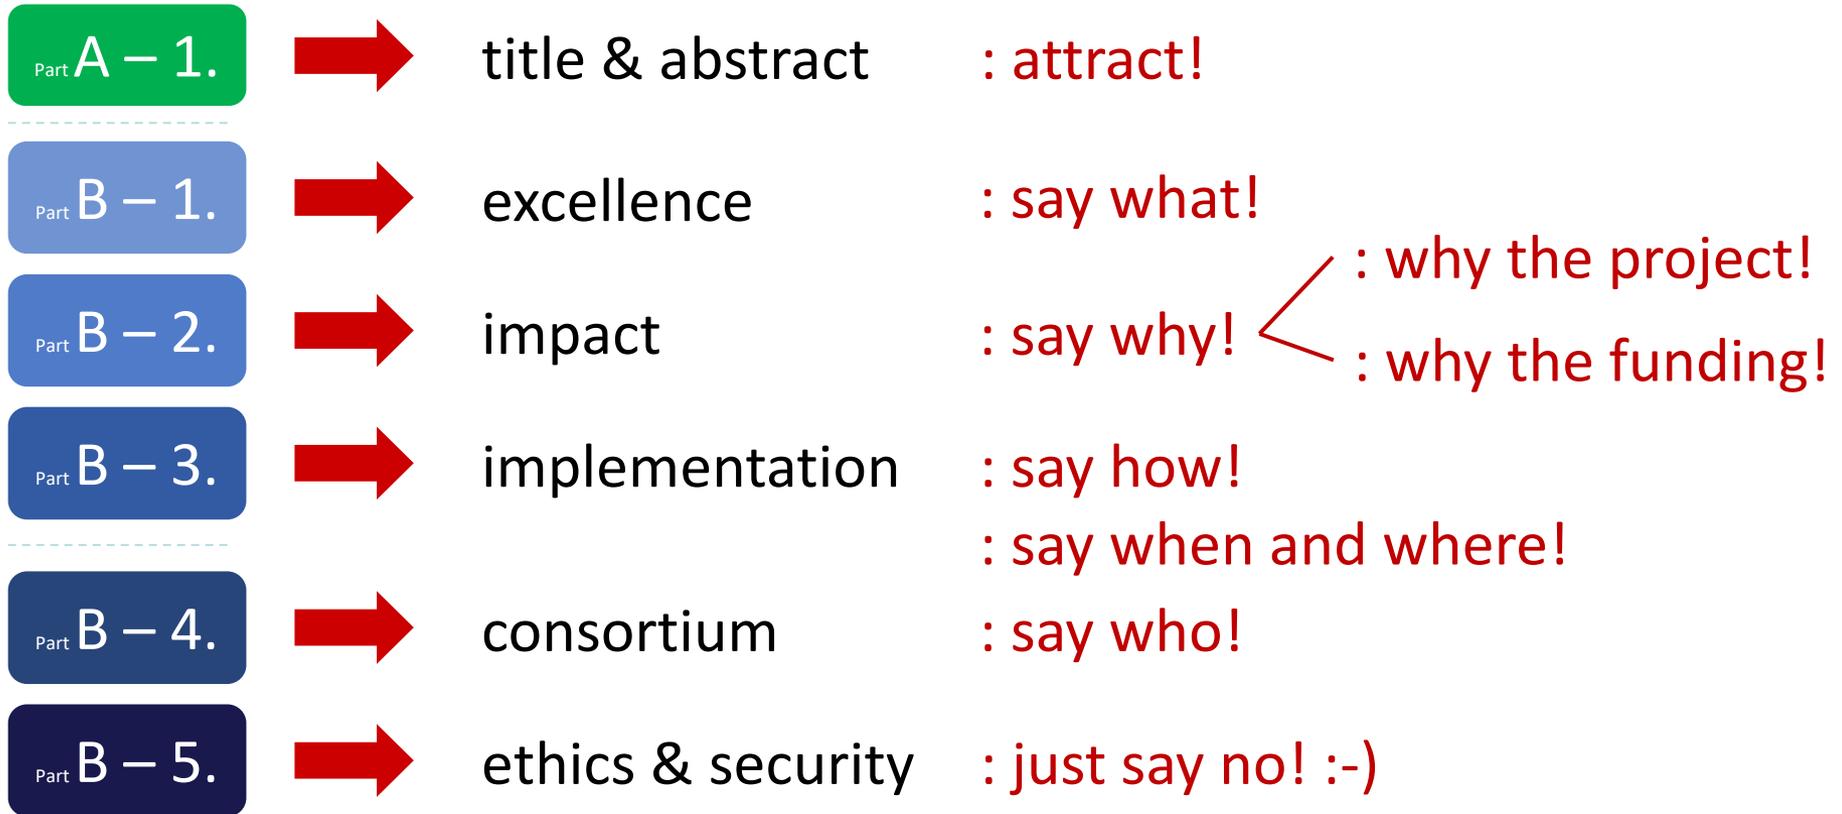

project description

macro structure of the proposal

macro structure of the proposal

Proposal submission

- Proposals must be **submitted electronically**, using the Commission's **Participant Portal**
<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/home>
- Proposals arriving at the Commission by any other means are regarded as '**not submitted**', and will not be evaluated.
- Only the **project coordinator** is authorised to submit the proposal.

- **Medium-size** projects are quite dynamic projects, not very large, focusing on a single research issue.
- Often mono-disciplinary.
- **Common structure:**
 - Between 8 and 10 partners from 3-4 countries;
 - Duration between 24 and 36 months.
 - Total budget around € 3M (**≠ EC financing!**).
- **Target audience:** Industry (including SMEs) and RTDs (research institutes, universities).

Administrative Forms (I)

• Form 1: General Information

- Topic, type of action, call identifier
- Proposal acronym
- Proposal title
- Duration
- Keywords and abstract
- Plus, some questions about previous/current submissions of the same proposal.
- Declarations

6. NON-EU COUNTRIES		
Does your research involve non-EU countries?	<input type="radio"/> Yes <input type="radio"/> No	
Do you plan to use local resources (e.g. animal and/or human tissue samples, genetic material, live animals, human remains, materials of historical value, endangered fauna or flora samples, etc.)?	<input type="radio"/> Yes <input type="radio"/> No	
Do you plan to import any material - including personal data - from non-EU countries into the EU? If you consider importing data, please also complete the section "Protection of Personal Data" [Box 4].	<input type="radio"/> Yes <input type="radio"/> No	
Do you plan to export any material - including personal data - from the EU to non-EU countries? If you consider exporting data, please also complete the section "Protection of Personal Data" [Box 4].	<input type="radio"/> Yes <input type="radio"/> No	
If your research involves low and/or lower middle income countries, are benefits-sharing measures foreseen?	<input type="radio"/> Yes <input type="radio"/> No	
Could the situation in the country put the individuals taking part in the research at risk?	<input type="radio"/> Yes <input type="radio"/> No	
7. ENVIRONMENT PROTECTION <small>Regulation 2003/1831 - #1 Directive 2009/81/EC - #1 Regulation EC No 2009/308 - #1 Directive 2009/36/EC - #1 Council Directive 2005/60/EC - #1 Council Directive 2000/365/EC - #1 Council Regulation EC No 339/02</small>		
Does your research involve the use of elements that may cause harm to the environment, to animals or plants?	<input type="radio"/> Yes <input type="radio"/> No	
Does your research deal with endangered fauna (and/or flora and/or protected areas)?	<input type="radio"/> Yes <input type="radio"/> No	
Does your research involve the use of elements that may cause harm to humans, including research staff?	<input type="radio"/> Yes <input type="radio"/> No	
8. DUAL USE III		
Does your research have the potential for military applications?	<input type="radio"/> Yes <input type="radio"/> No	
9. MISUSE		
Does your research have the potential for malevolent/criminal/terrorist abuse?	<input type="radio"/> Yes <input type="radio"/> No	
10. OTHER ETHICS ISSUES		
Are there any other ethics issues that should be taken into consideration? Please specify	<input type="radio"/> Yes <input type="radio"/> No	

I confirm that I have taken into account all ethics issues described above and if any ethics issues apply, I have attached the required documents.

1. Excellence

– Objectives

Clear, measurable, realistic and achievable.

– Relation to the work programme

How is the specific challenge and scope of the topic addressed.

– Concept and approach

- Overall concept – the idea at a glance!
PICTURE IT! BE CLEAR AND CREATIVE!
- Positioning – Technology Readiness Levels
- Linked activities – re-using results
- Overall approach and methodology – activities, phases

– Ambition

- State-of-the-Art – the starting point you dominate
- Innovation – your expected contribution to improve the SotA

2. Impact

– Expected impacts

- Contribution to expected impacts set out in the work programme, improving innovation capacity and integration of new knowledge, and other environmental and socially important impacts
- Barriers/obstacles and conditions – **regulation, standards**

– Measures to maximise impact

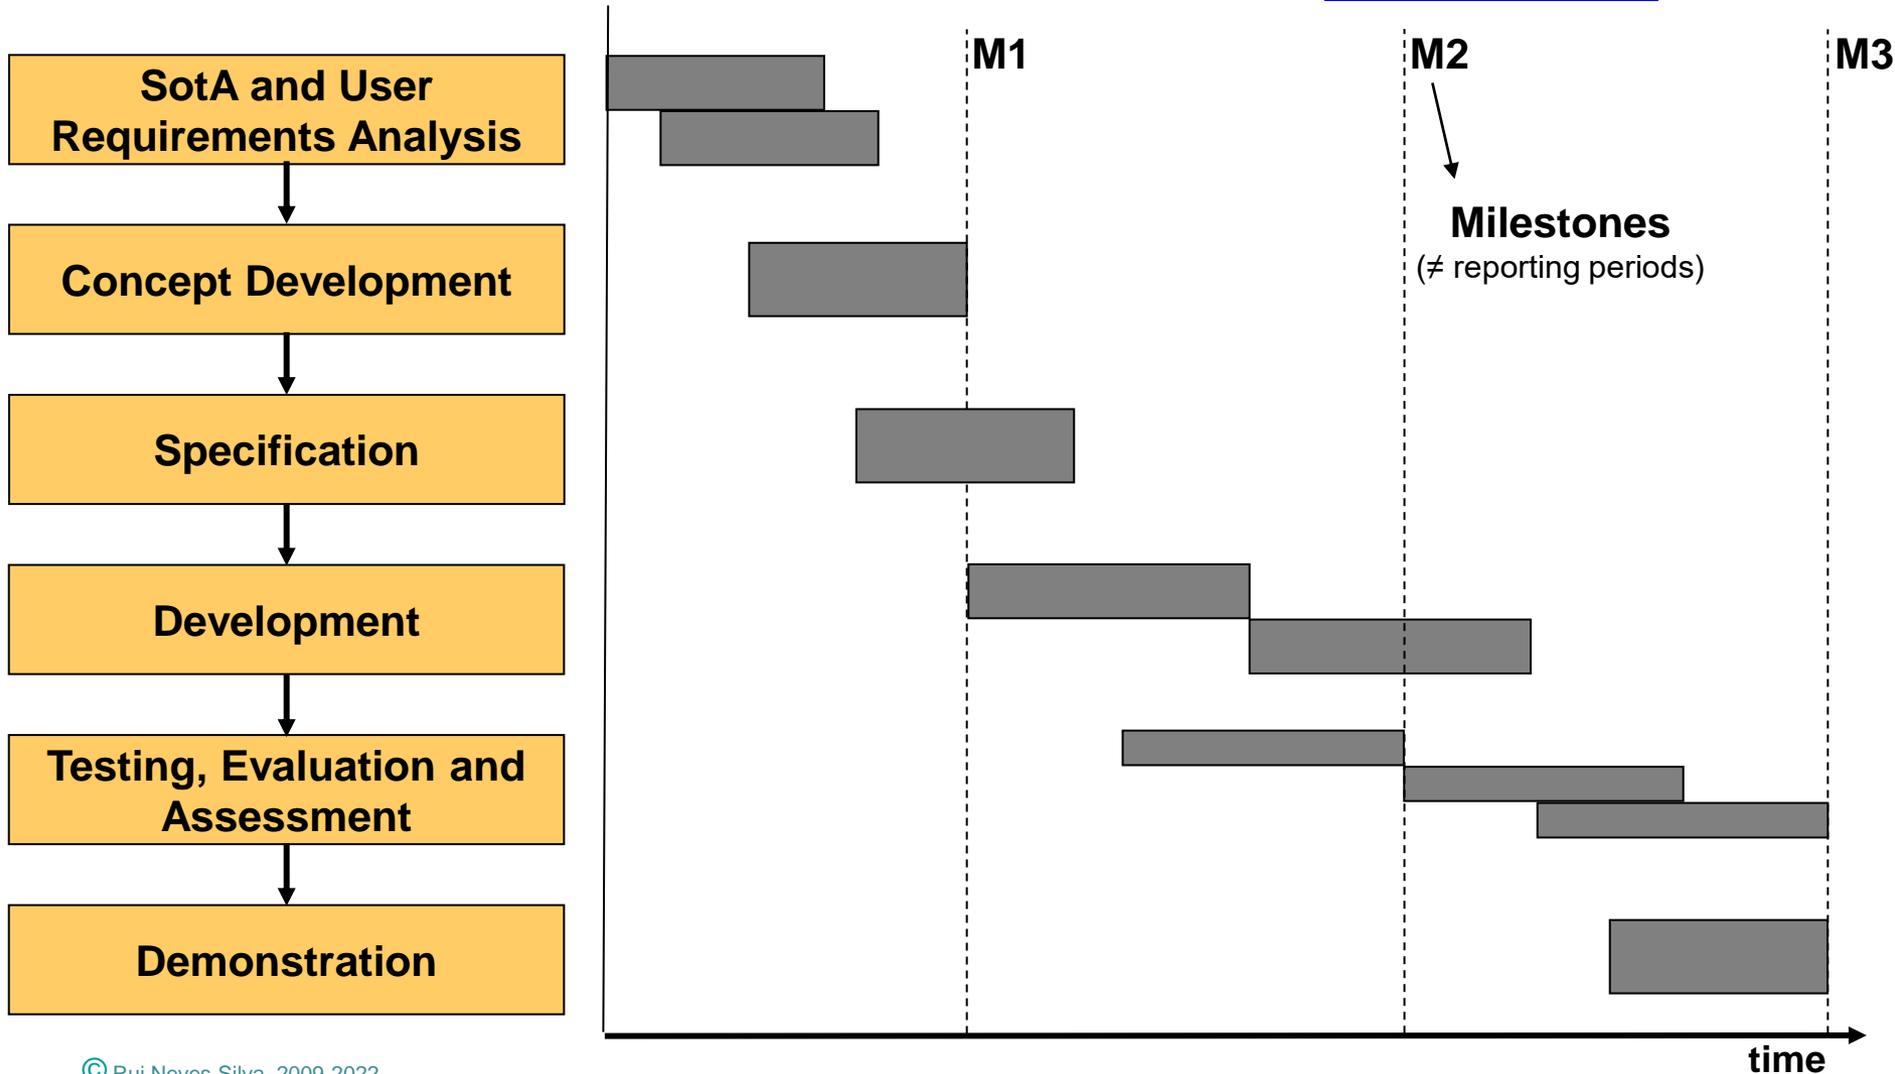

- Dissemination and exploitation of results
 - Plan for dissemination and exploitation of results – **how results will be shared and re-used**
 - Business plan
 - Management of research data generated
 - Strategy for knowledge management and protection – **gold or green open access**
- Communication activities – **promote the project**

3. Implementation

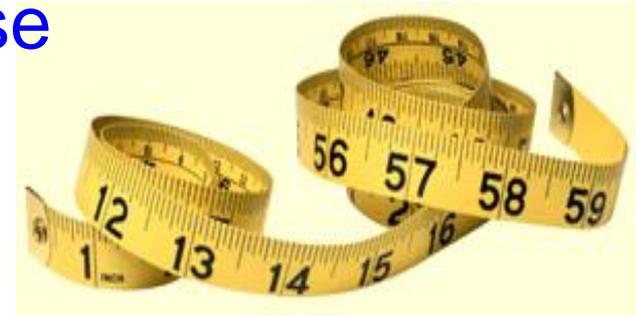

- Work plan – Work packages, deliverables and milestones
 - Overall structure of the work plan
 - Timing of work packages – Gantt chart
 - Detailed work description – each WP, WP list, deliverables list
 - Interdependencies of tasks – Pert diagram

Key aspects: the WP structure

- WPs should structure the workflow. **Example:**

- At some point, the scientific and technological objectives have to be translated in **socio-economical goals**.
- Typically, the industrial users within the consortium establish a set of **business objectives** to be achieved using the project results.
- It's very important to **quantify these objectives** comparing the current business situation (baseline) with the expected situation.
- The **assessment methodology** should demonstrate the ability to truly measure these quantities.

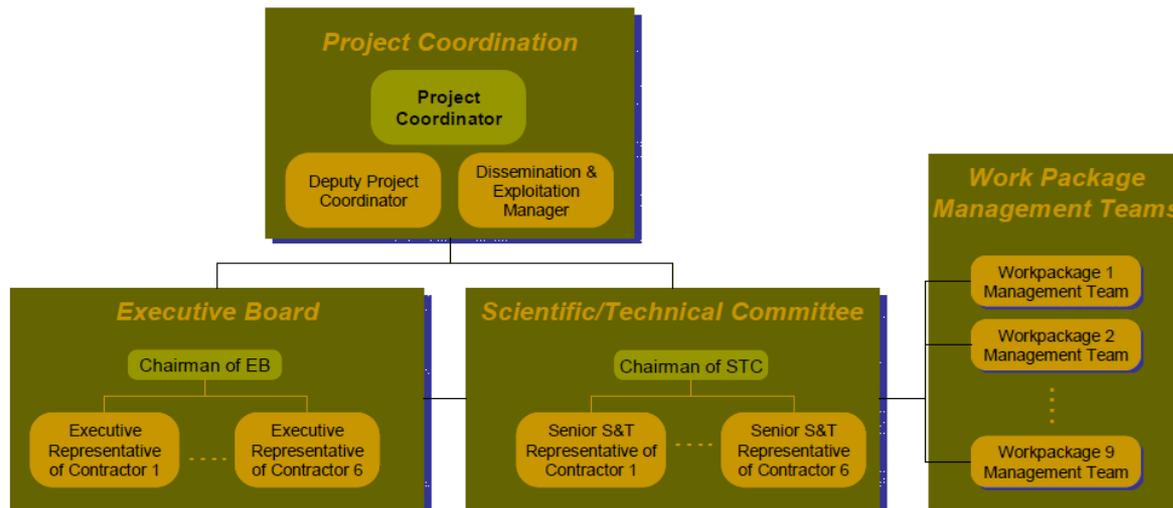

Key aspects: Gantt chart and budget

- Balance the participation of all partners within the consortium accordingly with the project objectives.
- Balance the budget but take into consideration the specific management costs (<7%) to the project coordinator.
- Note that, the coordinator does not own the project.
- If the project is accepted you will have to run it – don't put anything on the proposal that you don't want to do in case of success.
- Smooth the efforts contribution along the project duration as much as you can for all partners.

3. Implementation

- Management structure and procedures

- Consortium as a whole
- Resources to be committed

From the proposal to the project

HE Target: 5 months + 3 months

- **Submission**

- Is made electronically through a set of documents respecting detailed templates & guidelines, and... **in time (strict deadline!)**

- **Evaluation**

- A fair, transparent and relatively quick process (**5 months for informing applicants after deadline**) involving independent experts working on the basis of the Call documents and of (public) selection criteria

- **Negotiation**

- **If the proposal is pre-selected**, the proposers and the EC work together on the possibility to transform the proposal into a project, on the basis of evaluators' remarks and comments

- **Contract**

- (if the negotiation phase is successful) a contract is signed between the EC and the project coordinator, usually, around **8 months** after the submission deadline

- **Project**

- The project can then smoothly develop on the basis of a “Description of Work” and of the “Contract and its annexes” (administrative and financial issues)
- its progress will be reviewed by the EC every 18 months

Closing remarks

- Read the objectives of the open call;
- Keep your ideas on a restricted group;
- Build a balanced consortium and explain who is doing what;
- Picture your ideas as if you were explaining them in a kinder-gardening;
- Be nice to the evaluator: **clarity! clarity! clarity!**
- Don't forget to add anything but be concise;
- Give everything you've got in preparing the proposal (~1 month!);
- Most important: Don't give up on rejection, don't blame the referee - **learn from your mistakes!**

Homework assignment

- group of 3 persons prepare proposal to any call in the work-programme to any topic on cluster 7.
- **Elements to include:**
 - Proposal acronym, proposal title, duration, call identifier, keywords and abstract;
 - Consortium: identify the roles needed and give examples of true companies that could take them;
 - Concept and objectives, including business goals;
 - Study logic and structure of work plan (workpackages and tasks); draft Gantt chart;
 - Expected impacts listed in the work programme (Relation to the topics addressed by the Call);

Thank you for your attention!

RUI NEVES-SILVA

rns@fct.unl.pt
