

MARIA RIOS ([Projectos em curso](#))

**Seasonal ciclicity and high resolution paleoenvironmental reconstruction of the Miocene of Portugal unlocked by trace elements and stable isotopes in modern and fossil proboscideans. EXPL/CTA-PAL/0832/2021**

**The rise and fall of giraffes: macroevolutionary analysis of an endangered lineage**

**Objetivo:** Construction of the first time-calibrated phylogenetic tree of giraffids using total-evidence tip-dating techniques, as well as the study of their phenotypic evolution using phylogenetic modeling. Identification of factors modulating giraffes diversification and extinction.

Duração: 01/09/2020 a 01/09/2026

**Financiamento:** FCT Stimulus of Scientific Employment

**Membros GeoBioTec:** María Ríos Ibáñez
